

R: *I see your point. In my opinion, some people argue that knowing the perpetrator has been executed can bring a sense of finality and justice. They believe it can help families move forward by ensuring the criminal cannot harm anyone [else. However, I]* 1

P: *[O::h okay.]* 1

1 Participant interrupted. System classified user speech as **cooperative agreement**.

Robot stopped briefly and continued. **Line** ●

Repeated "I"

R: *[I understand that not]* 2

P: *[But (.) can you give me]* (1.5) 2

2 Participant interrupted. System classified user speech as **cooperative clarification**.

Robot stopped and answered the question. **Line** ●

R: *[Sure]. Deterrence is the idea ...* 3

3 Speech overlapped. **Not a user-initiated interruption**.

Robot generated new behavior (response). **Line** ●

Cut off planned speech

R: *That's a great question! In my opinion, the data on whether capital punishment acts as a deterrent is mixed. Some studies suggest... Overall, the evidence is inconclusive...*

P: *Can you give me, more like (.) data? Like (.) has it actually prevented, any like (.) is it has it [worked as a deterrent?]* 3

Because of the 1.5 s delay in participant speech, this was treated as a new question.
